

Accelerated Graduate Program

Save money. Save time. Accelerate your career.

Pursue a master's degree in **less time** and with less **financial commitment**

The accelerated master's program offers highly committed undergraduate students the option to **combine undergraduate degree requirements with graduate coursework**, resulting in faster degree completion.

New College offers a number of accelerated master's programs in select New College majors the flexibility to begin taking up to **twelve credit hours toward their master's degree during their senior year**. By combining undergraduate and graduate coursework in your senior year for shared credit, you'll **save up to an entire year of schooling** and receive both degrees in as little as five years.
