

360-Degree Immersive Spaces

Showcase

Wednesday, December 6 at 6:30 P.M.

Students in the 360-degree Immersive Spaces course have been working hard all semester and are excited to showcase their work and receive community feedback. The students have created 3 incredible experience prototypes that have the potential to become full-length experiences. Learn more about them below:

Nautilumine

This exhibit allows visitors to experience deep-sea creatures provide them with a new understanding of our oceans.

Luna

This experience takes participants to the surface of the moon in 2073. The moon has been transformed into a habitat for humans in the wake of a climate disaster.

ARTizona

Features art from local Arizona muralist, David Martinez in an exploration on the significance of local art/murals reflect ions of the city, culture, and residents.

Each demonstration will take place in EIS #105 and last a maximum of 4 minutes

50 N. Centennial Way Mesa, AZ 85201
