

ICICLE 2024 LEARNING ENGINEERING CONFERENCE

JULY 22-24, 2024
ARIZONA STATE UNIVERSITY
TEMPE, AZ

ABOUT

The International Consortium for Innovation and Collaboration in Learning Engineering (ICICLE) **2024 Learning Engineering Conference** is where industry, K-12, higher education, and government practitioners alike converge to share and explore cutting-edge insights into complex learning initiatives. Arizona State University's Learning Engineering Institute is hosting this year's event.

The conference theme focuses on "Solving for Complexity at Scale," acknowledging the implicit challenges of learning, from individual tutoring to massive open online courses and everything in between. Plan to attend and join the dynamic learning engineering community to explore a rich blend of theoretical insights and practical applications across a spectrum of topics including the learning sciences, cognitive science, computer science, learning design, technology innovations, and data science within a framework of human-centered design.

For anyone interested in the world of learning engineering, the conference serves as a catalyst for collaboration and knowledge exchange, offering a platform to share your work, learn from others' experiences, and broaden your understanding.

ASU SPECIAL

We're excited to offer all ASU faculty and staff an exclusive discount for the ICICLE 2024 conference! Use the special code **ASUTIX** to join learning engineering industry leaders in learning engineering, delve into crucial research, and gain insights to enhance our community. Let's come together as Sun Devils for this notable event. Don't miss out—register now and connect, learn, and contribute with us!

Register Here
Don't forget to use **ASUTIX**
for your ASU discount!
