

B2C2 Data Initiative Seminar

Fun with Visualization in the Data Deluge

Ross Maciejewski

September 16, 2020
1-2pm MST, Zoom

Password: 997378

From smart phones to fitness trackers to sensor enabled buildings, data is currently being collected at an unprecedented rate. In this talk, we will explore how visualization can be leveraged to help us entertain fun and unique questions in the data deluge. By thinking about fun questions for datasets, we will demonstrate how visual computing can help build cross-domain collaborations, paving the way to discover new insights and challenges.

Ross Maciejewski is an Associate Professor at Arizona State University in the School of Computing, Informatics & Decision Systems Engineering and Director of the CAO. His primary research interests are in the areas of geographical visualization and visual analytics. Professor Maciejewski is a recipient of an NSF CAREER Award (2014) and was named a Fulton Faculty Exemplar (2017) and Global Security Fellow at Arizona State. His work has been recognized through a variety of awards (2010, 2013, 2015, 2017, 2018). He currently serves as an Associate Editor for IEEE Transactions on Visualization and Computer Graphics.
