

You are invited to attend:

Using U.S. Census Website and Tools to Capitalize on Research and Statistical Data

Date: Tuesday February 14, 2017
Time: 9:30am – 12:30pm
Location: Arizona State University, Tempe campus
Hayden Library, Room C41
Map and parking information via www.asu.edu/map/interactive/

This hands-on training immerses participants in Census Bureau data, the most relied-on source for detailed, up-to-date socio-economic statistics covering every community in Arizona.

Who should attend? Faculty, researchers, librarians, and those who use census data for research purposes, budget analysis, needs assessment, developing policy, advocacy, grant writing and planning.

In a live computer lab setting, participants will navigate the U.S. Census Bureau website, [census.gov's](http://census.gov) data tools, interactive maps and quick searches. This will increase the participant's ability to find population numbers, make race/ethnicity comparisons and locate social/economic characteristics i.e., educational attainment, income, occupation, poverty on a community level.

Bring a laptop, or use your ASU authentication to log-on to a classroom workstation.

Please register (*required*) online at <https://www.eventbrite.com/e/using-us-census-website-and-tools-to-capitalize-on-research-and-statistical-data-tickets-31610766654>

For questions, please contact Brad Vogus, Government Information Librarian, at email vogus@asu.edu.

This workshop is brought to you by the ASU Library, in partnership with the U.S. Census Bureau-Data Dissemination Branch Customer Liaison & Marketing Services Office
