

Jumpstart your career! Go to grad school!

Learn more about the accelerated 4+1 combined BS/MS program and the traditional MS program in Applied Biological Sciences

Science and Mathematics Colloquium Series

**Presentation by faculty members
Heather Bateman and Catherine Hart**
Faculty of Science and Mathematics
ASU College of Integrative Sciences and Arts

**Wed., Sept. 26, 2018
3 – 4 p.m.**

**Student Union, Cooley Ballroom A
ASU Polytechnic campus**

How do I qualify? When should I apply? What are the benefits?

Faculty members Heather Bateman and Catherine Hart explain the application process and program features of two pathways to a graduate degree in applied biological sciences. One option is the combination bachelor's-master's program in which you earn both degrees in just five years by double dipping -- using 12 credits across both degree programs. The second option is the traditional two-year master of science degree.

A senior lecturer in mathematics in the College of Integrative Sciences and Arts since 2016, **Catherine Hart** most recently served as interim faculty head of the Faculty of Science and Mathematics. Hart has taught at ASU since 2003, previously serving as a faculty associate and lecturer. She has expertise in best practices in teaching math for specific contexts and in incorporating relevant technologies and practical skills that will help students succeed in their courses and in the workforce.

Associate professor **Heather Bateman** is an award-winning field ecologist, conservation biologist, and student mentor. Dr. Bateman is interested in how human land-use affects vertebrate populations and habitats, especially in riparian ecosystems. Her research interests lie in exploring wildlife responses to habitat alteration, with a particular interest in amphibians, reptiles, and birds.
