

Qur'an and Science: The Renewable Miracle

Spring 2017 Annual Lecture Series featuring

Dr. Shabib Alhadheri

A pediatric cardiologist and active member of the Phoenix metropolitan community, Dr. Shabib Alhadheri is a scientist and researcher in Qur'anic and Islamic Studies

Organized and moderated by Dr. Souad T. Ali, CAIS Founding Chair

Wednesday, February 8, 2017

6:00 P.M.

ASU Tempe Campus, LL 2 Free & open to all ASU students, staff, faculty, & the public

This Lecture will feature Dr. Alhadheri's analysis of what he perceives to be the connection between the Qur'an and science. As he indicated:

"The Holy Qur'an, Islam's Sacred Text, was revealed through the Archangel Gabriel to the Prophet Muhammad (PBUH) more than 1400 years ago. Among the many miracles the Qur'an contains are the scientific facts that scientists came to prove centuries later as a witness, Muslims believe, that it is the truth revealed from God (Allah) and reflecting the ultimate Divine knowledge."
Dr. Shabib Alhadheri

Dr. Shabib Alhadheri

A fellow, based in Phoenix AZ, of the American Academy of Pediatrics, the American College of Cardiology and the American Heart Association, Dr. Shabib Alhadheri is a scientist and researcher in Qur'anic and Islamic Studies. He has published several books in Arabic, including:

A Renewable Miracle: Kuttout of Scientific Miracles in the Qur'an and Sunnah. Exploring scientific miracles of the Holy Qur'an and the Prophetic teachings and correlating them to the most recent proven scientific facts, Dr. Alhadheri has been a guest keynote speaker at national and international Universities, scholarly conferences, interfaith forums, and religious institutions. He is a proud father of four children, three graduated from Arizona State University and pursuing Medical School nationally. His daughter is currently pursuing a Master's Degree program at ASU.
