

The Power of Citizen Science

Delivering conservation outcomes through education, research, and monitoring

Science and Mathematics Colloquium Series

Presentation by Tiffany Sprague
Manager, Parsons Field Institute
McDowell Sonoran Conservancy

Wed., Oct. 17, 2018
3 – 4 p.m.

Student Union, Cooley Ballroom A
ASU Polytechnic campus

Tiffany Sprague has devoted her life to protecting our natural world while educating and inspiring others to do the same. As manager of the Parsons Field Institute at McDowell Sonoran Conservancy, Sprague is focused on research and education to manage and protect the largest urban preserve in the nation, McDowell Sonoran Preserve.

As a wildlife biologist, Sprague has worked with a variety of wildlife and habitat restoration projects with the National Park Service, Arizona Game and Fish Department, and others, on projects ranging from bats to snakes to black-footed ferrets and more. She has also worked with several non-profit organizations, including the Arizona Chapter of Sierra Club, seeking to educate the public and policy-makers on environmental issues.

Faculty and practitioners discuss their current research and field projects in the Science and Mathematics Colloquium Series, held throughout the academic year at ASU's Polytechnic campus. All seminars are free and open to the public.

Tiffany Sprague earned a bachelor of science in wildlife sciences from the University of Arizona and a master of science in applied biological sciences from Arizona State University's College of Integrative Sciences and Arts at ASU Polytechnic campus. She serves as president of the

Arizona Chapter of The Wildlife Society. Tiffany's goal in life is simple: she wants to save the world.
